Higher Education In Ontario: Some Vital Statistics

Ontario

Distance as a postsecondary access issue - Statistics Canada published by the Higher Education Quality Council of Ontario has released three new reports highlighting the demographic changes and educational attainment trends in Ontario.

2. According to Statistics Canada, the Ontario postsecondary education system has seen significant changes. The number of Ontario students has increased, with a particular focus on international students. The population of Ontario adults who have completed some post-secondary education (PSE) has also increased.

3. The report notes that Ontario will face significant challenges in the near future as the population continues to grow. In 2009, 63% of Ontario adults had completed some PSE, the highest such Post-secondary education (PSE) rate. As of 2021, the Ontario government is planning to increase funding by $10 million to Statistics Canada for the Postsecondary Student Information System.

4. The report concludes that "higher education is a critical priority to achieve sustainable outcomes. In a knowledge economy, it is almost certain that those without a base level of skills will be at a disadvantage." The report emphasizes the importance of education and skills development, particularly in higher education and postsecondary education.

5. The Higher Education Quality Council of Ontario (HEQCO) has published several reports on the Ontario higher education system, including "A New Vision For Higher Education in Ontario: Some Vital Statistics." The HEQCO reports highlight the importance of lifelong learning and the accessibility of Ontario’s higher education system.

6. The HEQCO reports also note that the Ontario education system is supported by a diverse group of stakeholders, including government agencies, universities, and other educational institutions. The reports provide statistics on the number of students, graduates, and funding sources.

7. The HEQCO reports also highlight the importance of international students in the Ontario higher education system. International students contribute to the diversity of the student body and provide economic benefits to the province. The reports note that the number of international students has increased significantly in recent years.

8. The HEQCO reports also discuss the challenges faced by the Ontario higher education system, including funding, access, and equity. The reports recommend that any funding formula review should be to create new models that strike a balance between the college funding model and the university funding model.

9. The HEQCO reports also highlight the importance of innovation and research in the Ontario higher education system. The reports note that research is an essential component of higher education and skills development.

10. The HEQCO reports also discuss the role of the government in supporting the Ontario higher education system. The reports note that the government plays a crucial role in providing funding, setting policy, and providing support to postsecondary education institutions.

11. The HEQCO reports also highlight the importance of the HEQCO’s role in shaping universities. The HEQCO supports the development of learning outcomes, degree level expectations, and other critical priorities to achieve sustainable outcomes.

12. The HEQCO reports also discuss the importance of lifelong learning and the accessibility of Ontario’s higher education system. The reports note that access is a critical priority and that the government should provide support to postsecondary education institutions to ensure access for all.
